SUMMARY

Security+ certified Cybersecurity Student specializing in threat detection, incident response, and cloud security architecture (AWS IAM). Experienced in SIEM rules development, PCAP network analysis, and endpoint troubleshooting. Bilingual in English and Arabic.

TECHNICAL EXPERIENCE

- Cloud Security & IAM: Provisioned AWS IAM users, roles, and security policies across multi-tier environments; applied Least Privilege access controls, Multi-Factor Authentication (MFA), and Role Based Access Control (RBAC) to restrict unauthorized resource access.
- Threat Detection & Incident Response (TDIR): Utilized SIEM tools in Kibana for log investigation, threat detection, and supporting incident response. Proficiency in deploying and managing Elastic SIEM environments, developing custom alert rules, performing advanced log analysis to identify security incidents, and building metric dashboards for enhanced visibility.
- Digital Forensics & Network Analysis: Experienced in analyzing network traffic with Wireshark and performing digital forensics with FTK Imager, and Autopsy.
- HomeLab: Deployed a single-node Proxmox VE homelab environment segmenting network traffic and hosting virtualized security tools (SIEM, IDS/IPS, and DNS filtering).
- Completed hands-on TryHackMe modules focusing on penetration testing techniques, threat hunting, and network defense.
- Automation & System Administration: Engineered custom Python scripts to automate administrative tasks and streamline OS workflows. Managed local user accounts, access permissions, system services, and security configurations across Windows (MMC, PowerShell) and Linux CLI environments.

CERTIFICATIONS

- CompTIA Security+, CompTIA Network+
- Software Testing Training

EXPERIENCE

- Manager | Jasmine Alsham Mediterranean Grill and Market | Urbana, MD (November 2018 - Present)
- Managed daily storefront operations, financial transactions, and inventory for a high-volume food service venue.
 - Managed local network connectivity, POS terminal updates, and hardware troubleshooting.
 - Configured and deployed end-user devices, providing hands-on instruction and technical guidance to team members.
- Overnight Stocking Associate (Seasonal) | Target | Frederick, MD (October 2023 - January 2024)
- Executed overnight inventory auditing, large-scale shipment processing, and stock organization under strict operational timelines.

TECHNICAL SKILLS

- Operating Systems & Virtualization: Windows, Linux (Ubuntu/Debian), Proxmox VE, Active Directory, MMC.
- Security & Network Analysis: Elastic SIEM, Wireshark, FTK Imager, Autopsy, AWS IAM, TCP/IP, PCAP Analysis.
- Scripting & Tools: Python, Java, SQL, PowerShell, Bash, Git, Microsoft Office Suite.
- Professional Strengths: Technical Training, Cross-Functional Team Collaboration, Customer Operations.
- Languages: English (Fluent), Arabic (Fluent / Bilingual).

EDUCATION

Bachelor's Degree in Cybersecurity - Capitol Technology University. (Expected April, 2028)
Associate's Degree in Information Technology - Frederick Community College. (Completed March, 2026)
Associate's Degree in Cybersecurity - Frederick Community College. (Completed May, 2025)
Honors & Memberships: Member of the Honor Society and Phi Theta Kappa Honor Society (PTK)

Relevant Coursework: Cloud Security, Computer Networking, Digital Forensics and the Investigation Process, Introduction to Programming Using Python, Secure Data Communications and Cryptography, Systems Analysis & Design, UNIX/Linux Operating System, Virtualization & Cloud Essentials, Cloud System Admin, Comprehensive Computer and Network Security, Cybercrime & Digital Forensics, Networking Fundamentals, Penetration Testing.
