### SUMMARY

Aspiring Cybersecurity Analyst | Security + | Foundation in Frameworks (MITRE ATT&CK, Kill Chain) | Hands-on Lab Builder | SIEM, Network Defense, & Digital Forensics. Possesses excellent analytical and organizational skills, with strong attention to detail and quality, crucial for accurate threat investigation and reporting. Looking to gain experience in Cyber defense

### TECHNICAL PROFICIENCY & HANDS-ON EXPERIENCE

- Cloud Security & Management: Managed and secured AWS services, applying best practices for scalability and protection.
- Threat Detection & Incident Response (TDIR): Utilized SIEM tools in Kibana for log investigation, threat detection, and supporting incident response. Gained proficiency in deploying and managing Elastic SIEM environments, developing custom alert rules, performing advanced log analysis to identify security incidents, and building metric dashboards for enhanced visibility.
- Digital Forensics & Network Analysis: Experienced in analyzing network traffic with Wireshark and performing digital forensics with Exterro FTK Imager.
- Homelab: Currently scaling a secure 1-node Proxmox cluster to manage high-availability services, maintain a layered security stack including SIEM, IDS/IPS, Firewall, and DNS Filtering.
- Offensive/Defensive Skills: Regularly complete labs on TryHackMe to strengthen offensive/defensive skills and apply classroom concepts to real-world scenarios.
- Programming & OS Management: Applied Cyber Defence Frameworks and Threat Intelligence. Developed coding skills in Java and Python; expertise includes Microsoft Management Console (MMC), Powershell and Linux/Bash systems administration (TryHackMe).

### CERTIFICATIONS

- CompTIA Security+
- Software Testing Training

### EXPERIENCE

- Manager** | Jasmine Alsham Mediterranean Grill and Market November 2018-Present
- Direct daily operations including inventory, vendor payments, and digital marketing.
  - Balance food prep and high-volume customer service while maintaining strict safety standards.
- Overnight Stocking Associate seasonal** | Target October 2023- January 2024
- Managed large-scale inventory shipments during overnight shifts, ensuring the store was fully stocked and organized before opening.
  - Worked independently under tight deadlines to meet high-volume goals while maintaining a clean and safe work floor.

### PROFESSIONAL SKILLS

- Communication & Collaboration: Experienced professional skilled at interfacing with others in teams or on individual levels to ensure organizational goals are attained.
- Adaptability & Focus: Ability to thrive under pressure and function effectively in a fast-paced environment under tight deadlines (e.g., during incident response or critical security events).
- Customer Focus: Successful career in customer service and business development, enabling strong stakeholder communication and clear explanation of technical issues to non-technical audiences"
- Multi-lingual: Fluent in Arabic and English
- Software: Proficient in Microsoft Office Suite

### EDUCATION

- Bachelor's in Cybersecurity** - Capitol Technology University. (Expected April, 2028)
- Associate's Degree in Information Technology** - Frederick Community College. (Completed March, 2026)
- Associate's Degree in Cybersecurity** - Frederick Community College. (Completed May, 2025)
- Honors & Memberships: Member of the Honor Society and Phi Theta Kappa Honor Society (PTK)
